

Manuali i perdorimit te softuerit

Manuali i perdorimit te softuerit qe eshte i zhvilluar me ane te sistemit Laravel ne gjuhen programuese PHP.

Laraveli eshte sistem framework, i cili ndihmon zhvilluesit e softuereve ne zhvillim e softuereve shume kualitativ.

Pra, me ane te Laravel framework, kemi zhvilluar sistemi per menaxhimin e studenteve, sistem jo shume qe i kam kushtuar rendesi zhvillimin e ketij softueri, por jam munduar sado pak ne zhvillimin e disa gjerave elementare te softuerit, sic jane per shembull: regjistrimin e studenteve, fshirjen e studenteve, shfaqjen e detajave te studenteve dhe perditesimin e te dhenave te studenteve.

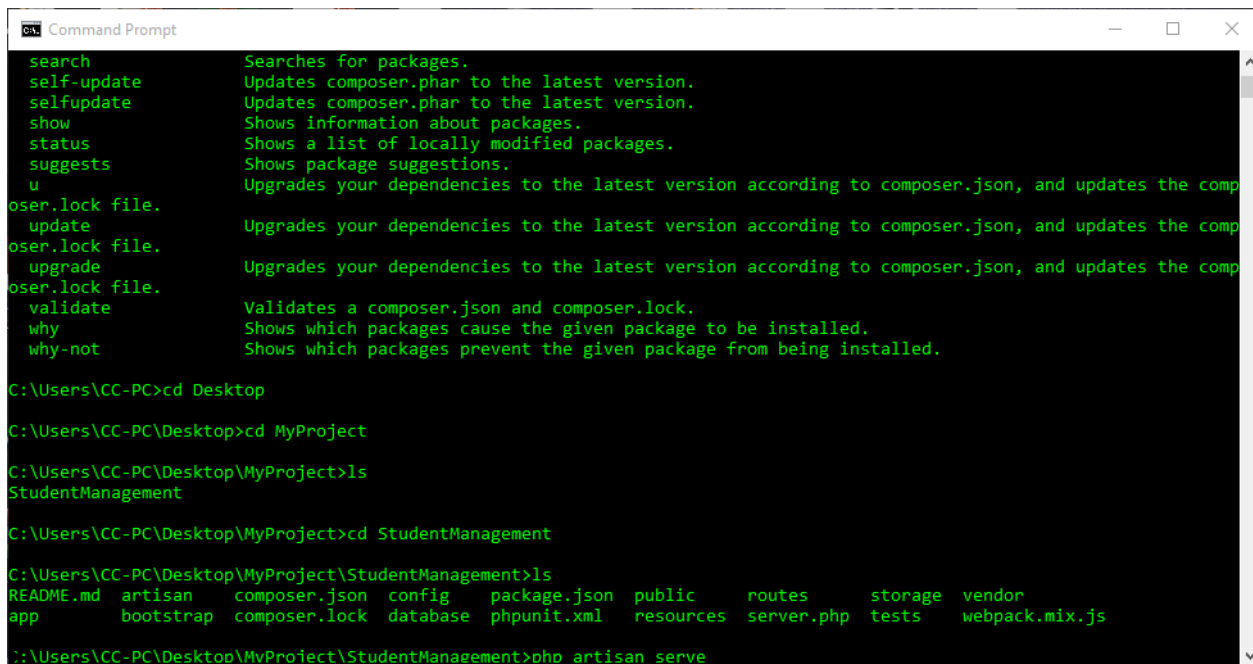

Me pak fjale, do te mundohem qe te shpalosi te gjithë projektin qe kam zhvilluar poashtu edhe pamjet e softuerit gjate testimit te tij.

Sistemi per menaxhimin e studenteve

Projekti me larte kemi thene qe eshte zhvilluar ne sistemin framework Laravel ne gjuhen programuese PHP.

Per te ekzekutuar kodin ne Laravel PHP perdorim command prompt (cmd) si me poshte:

php artisan serve

```
Command Prompt
search          Searches for packages.
self-update     Updates composer.phar to the latest version.
selfupdate      Updates composer.phar to the latest version.
show            Shows information about packages.
status          Shows a list of locally modified packages.
suggests        Shows package suggestions.
u               Upgrades your dependencies to the latest version according to composer.json, and updates the comp
composer.lock file.
update          Upgrades your dependencies to the latest version according to composer.json, and updates the comp
composer.lock file.
upgrade         Upgrades your dependencies to the latest version according to composer.json, and updates the comp
composer.lock file.
validate        Validates a composer.json and composer.lock.
why             Shows which packages cause the given package to be installed.
why-not         Shows which packages prevent the given package from being installed.

C:\Users\CC-PC>cd Desktop
C:\Users\CC-PC\Desktop>cd MyProject
C:\Users\CC-PC\Desktop\MyProject>ls
StudentManagement
C:\Users\CC-PC\Desktop\MyProject>cd StudentManagement
C:\Users\CC-PC\Desktop\MyProject\StudentManagement>ls
README.md  artisan  composer.json  config  package.json  public  routes  storage  vendor
app        bootstrap  composer.lock  database  phpunit.xml  resources  server.php  tests  webpack.mix.js
C:\Users\CC-PC\Desktop\MyProject\StudentManagement>php artisan serve
```

Gjate ekzekutimit te ketij kodi ne command prompt, shkojme ne google chrome dhe ne vend ku shenohen URL adresa, shenojme kete: 127.0.0.1:8000.

Student Management in Laravel PHP

Ne vendin ku e kemi URL Adresen e shtojme kete:
127.0.0.1:8000/account. Ketu shfaqet pjesa ku
validohet perdoruesi.

Login System in Laravel PHP

[Register user](#)

Enter Email

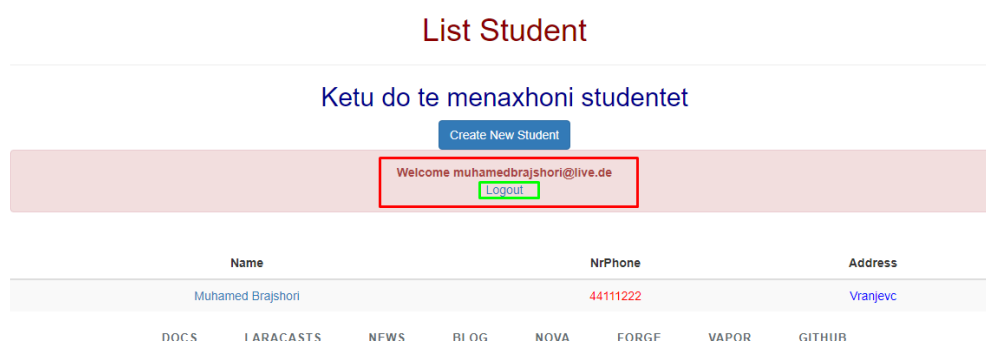

Enter Password

[Login](#) [Clear](#)

Duke dhene kredencialet e perdoruesit per validim, klikojme Login dhe na shfaqet kjo pamje:

Student Management in Laravel PHP

Pjesa e nenvizuar me te kuqe tregon qe perdoruesi me emailin muhamedbrajshori@live.de eshte qasur ne menyre te sukseshme ne sistem. Kurse me te gjelbert kemi butonin Logout, i cili na tregon qe perdoruesi del nga qasja e sistemit, dhe ketu na shfaqet pjesa e formes Login, si me poshte:

Login System in Laravel PHP

Register user

Enter Email

muhamedbrajshori@live.de

Enter Password

Login Clear

Per te regjistruar nje perdoruesi te ri duhet te klikoni ne butonin Register user, sikur ne foton me larte.

User Registration System in Laravel PHP

Enter Name

Muhamed Brajshori

Enter email

muhamedbrajshori@live.de

Enter password

Register Clear

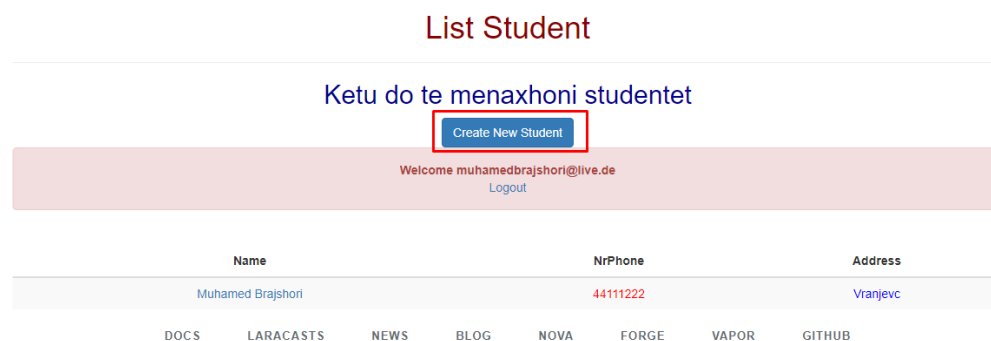

Ne kete pamje, regjistrojme perdoruesin duke dhene vlerat ne fushat e zbraza dhe duke klikuar ne butonin Register.

Pasi kemi klikuar butonin Register, na shfaqet forma Login per te validuar perdoruesin.

Pas kesaj, shkojme per te regjistruar studentin e ri, si ne pamjen me poshte:

Student Management in Laravel PHP

Pjesa e nenvizuar me te kuqe tregon se duhet klikuar ne butonin Create New Student, i cili na mundeson per te kaluar ne formen per regjistrimin e studentit.

Student Management in Laravel PHP

Create Student

Ketu do te regjistroni studentet

DOCS LARACASTS NEWS BLOG NOVA FORGE VAPOR GITHUB

Pjesa e nenvizuar me te kuqe tregon studentin e regjistruar ne sistem.

Ne kolonen Name klikojme ne emrin Hajdar Hajdari dhe na shfaqet kjo pamje:

Student Management in Laravel PHP

Aty ku e kemi butonin Edit Student, klikojme dhe na shfaqet pamja per editim e te dhenave te studentit.

Student Management in Laravel PHP

Edit Student

Ketu do te editoni studentet

Name	<input type="text" value="Enter student name"/>
NrPhone	<input type="text" value="Enter student NrPhone"/>
Address	<input type="text" value="Enter student Address"/>

- The student name field is required.
- The student nrphone field is required.
- The student address field is required.

Kemi hequr vlerat e perditesuara nga fushat (textbox), kemi klikuar ne butonin Update per te treguar qe forma Edit Student eshte forme e validimit, qe tregon me poshte tri fushat (field) kerkohen (is required), pra duhet te jene te mbushura me te dhenat prej bazes se te dhenave.

Per editim e te dhenave te studentit kemi pamjen me poshte:

Student Management in Laravel PHP

Edit Student

Ketu do te editoni studentet

Name	<input type="text" value="Hajdar Hajdari 1"/>
NrPhone	<input type="text" value="44222555"/>
Address	<input type="text" value="Bregu i Diellit"/>

- The student name field is required.
- The student nrphone field is required.
- The student address field is required.

Ne fushen Name e patem vleren Hajdar Hajdari e shtuam vleren Hajdar Hajdari 1 per te bere perditesimin e te dhenave te studentit. Per kete klikojme butonin Update.

Pasi kemi klikuar ne butonin Update, na shfaqet kjo pamje:
